São Carlos, SP, Brazil

Profile

Statistics and Data Science undergraduate at the Universidade Federal de São Carlos (UFSCar), expected to graduate in December 2028. CNPq Undergraduate Research Fellow working with Random Forests, stability selection, graph learning, and high-dimensional genetic data. Member of PET Estatística at UFSCar, with previous professional experience in e-commerce management. Interested in statistical computing, machine learning, data science, and data-driven business applications.

Education

Bachelor's Degree in Statistics and Data Science **2025 – Dec. 2028 (Expected)**

Universidade Federal de São Carlos (UFSCar)

São Carlos, SP, Brazil

Weighted Average: 7.72/10

Bachelor of Science and Technology — Incomplete **2024 – 2025**

Universidade Federal do ABC (UFABC)

Santo André, SP, Brazil

Professional Experience

E-commerce Manager **Jun. 2025 – Jun. 2026**

Brás & Cia Comércio de Roupas e Acessórios LTDA

- Managed the day-to-day e-commerce operation, including product listings, sales monitoring, and online sales channels.
- Worked on process organization and automation to reduce repetitive tasks and improve operational efficiency.
- Monitored business performance and used sales data to support operational and commercial decisions.
- Contributed to improvements in the e-commerce operation during a period in which revenue increased by more than 150%.

Research Experience

CNPq Undergraduate Research Fellow **2026 – Present**

Universidade Federal de São Carlos (UFSCar)

Project: Genotype–phenotype graph learning using Random Forests and stability selection.

Supervisor: Prof. Dr. Thiago Ramos.

- Study graph learning for high-dimensional genotype–phenotype data using Random Forests and stability selection.
- Implement experiments involving repeated subsampling, variable importance, feature selection, and graph construction.
- Develop the research pipeline in Python using Pandas, NumPy, Scikit-learn, and NetworkX.

Academic Experience

PET Estatística — External Relations Member **2026 – Present**

Universidade Federal de São Carlos (UFSCar)

- Participate in academic, scientific, and outreach activities related to Statistics.
- Support external communication, partnerships, and activities organized by PET Estatística.

Selected Projects

Random Forest Importance and Stability Analysis 2026

Python, Scikit-learn, Pandas, NumPy, NetworkX

Implemented a Python pipeline to train Random Forest models on repeated subsamples, compare variable importance across runs, identify stable variables, and represent relationships as graphs.

Marketplace Promotions 2025 – Present

Python, Streamlit, Pandas, NumPy

Developed a web application for analyzing marketplace product data, comparing products, and identifying pricing and promotional opportunities.

Personal Finance Control 2026

Python, Streamlit, Plotly, Turso

Built a personal finance web application for tracking expenses, recurring transactions, financial goals, and monthly spending through an interactive dashboard.

Technical Skills

Programming: Python, SQL, R (basic)

Python & Data Science: Pandas, NumPy, Scikit-learn, Matplotlib, Plotly, Streamlit, NetworkX

Data & Visualization: Exploratory data analysis, statistical modeling, Power BI, Excel, SQLite

Tools: Git, GitHub, Jupyter Notebook, Linux, LaTeX

Extracurricular Activities

INSABOTS — Robotics Team 2017 – 2020

Robotics

Participated in robotics projects and competitions, including FIRST LEGO League (FLL) and the Brazilian Robotics Olympiad (OBR).

Languages

Portuguese: Native English: Advanced
